Summary

My goal is to develop general-purpose agents. During my PhD, I have focused on world models, primarily using diffusion and video data, as well as offline reinforcement learning and meta-learning. I have developed ML systems throughout my career, working as a research scientist on video modeling for robotics and autonomous vehicles, as well as a software engineer on both ML applications and infrastructure. I am currently seeking research scientist roles, starting from December 2025.

Education

University of Oxford – DPhil in Engineering Science 2021-Sept 2025 (Expected)

Topics: Diffusion, Video Models, Offline and Meta Reinforcement Learning.
Member of the AIMS CDT – supervised by Jakob Foerster and Shimon Whiteson.

University College London – MSc in Machine Learning 2020-2021

Thesis: Model-Based Task Inference for Meta-Reinforcement Learning
Distinction, 87% – Dean's List.
Supervised by Tim Rocktäschel and Edward Grefenstette.

University of Cambridge – BA in Computer Science 2017-2020

Thesis: Real-Time Video Super-Resolution
First-Class Honors, 86% – Senior Scholar, ranked 2/99 in cohort.
Highly Commended (top 5) Dissertation – supervised by Pietro Liò.

Research Experience

Google DeepMind – Student Researcher May-Nov 2025

Working in the Open Endedness Team on applications of Genie to robotics.

Wayve – Research Scientist Intern May-Oct 2024

Worked in the World Models Team around GAIA, Wayve's generative vision-language-action (VLA) model for self-driving. Completed projects on vision transformer interpretability, latent diffusion, offline reinforcement learning, and multimodal video generation.

SWE Experience

Amazon – Software Engineering Intern

Jun-Sept 2020

Worked in the Alexa Knowledge Group, developing Java software to rank natural language answers to user questions. Implemented features running on all Alexa Q&A queries.

Arm – Software Engineering Intern

Jun-Sept 2019

Worked in the Machine Learning Software Group, developing Arm's neural network inference engines in C++. Reviewed deep learning research and added support for new architectures.

Cubica Technology (acquired) – Software Engineering Intern

Jul-Sept 2018

Developed a Python tool to identify and label reoccurring identities across large-scale video databases. Implemented random forest and tracking methods for video summarization.
