Summary

My goal is to develop general-purpose agents. During my PhD, I have focused on world models, primarily using diffusion and video data, as well as offline reinforcement learning and meta-learned algorithms. I have developed ML systems throughout my career, working as a research scientist on autonomous vehicles and as a software engineer on both ML applications and infrastructure. I am currently seeking internship and full-time research scientist roles, starting as early as March 2025.

Education

University of Oxford – DPhil in Engineering Science   2021-Sept 2025

Topics: Diffusion, Video Models, Offline and Meta Reinforcement Learning
Member of the AIMS CDT – supervised by Jakob Foerster and Shimon Whiteson.

University College London – MSc in Machine Learning   2020-2021

"Model-Based Task Inference for Meta-Reinforcement Learning"
Distinction, 87% – Dean's List.
Supervised by Tim Rocktäschel and Edward Grefenstette.

University of Cambridge – BA in Computer Science   2017-2020

"Real-Time Video Super-Resolution"
First-Class Honors, 86% – Senior Scholar, ranked 2/99 in cohort.
Highly Commended (top 5) Dissertation – supervised by Pietro Liò.

Experience

Wayve – Research Scientist Intern   May-Oct 2024

Worked in the World Models Team around GAIA, Wayve's generative vision-language-action (VLA) model for self-driving. Completed projects on vision transformer interpretability, latent diffusion, offline reinforcement learning, and multimodal video generation.

Amazon – Software Engineering Intern   Jun-Sept 2020

Worked in the Alexa Knowledge Group, developing Java software to rank natural language answers to user questions. Implemented features running on all Alexa Q&A queries.

Arm – Software Engineering Intern   Jun-Sept 2019

Worked in the Machine Learning Software Group, developing Arm's neural network inference engines in C++. Reviewed deep learning research and added support for new architectures.

Cubica Technology (acquired) – Software Engineering Intern   Jul-Sept 2018

Developed a Python tool to identify and label reoccurring identities across large-scale video databases. Implemented random forest and tracking methods for video summarization.

Selected Publications

Policy-Guided Diffusion
Matthew T. Jackson, Michael T. Matthews, Cong Lu, Benjamin Ellis, Shimon Whiteson, Jakob Foerster

2022 ———————————————————————————————————————

Hypernetworks for Meta-Reinforcement Learning
    Jake Beck, **Matthew T. Jackson**, Risto Vuorio, Shimon Whiteson
    CoRL 2022   [ArXiv]

Multi-Modal Fusion by Meta-Initialization
    Matthew T. Jackson*, Shreshth Malik*, Michael T. Matthews, Yousuf Mohamed-Ahmed
    FARSCOPE Robotics Workshop 2022 (Best Poster Award)   [ArXiv]

Software

Languages   **Frameworks**

    Python, C++, Java, OCaml, SML, HTML/CSS, Bash   JAX, PyTorch, Lightning

Academia

Tutor
    Reinforcement Learning (PhD course), Machine Learning (MSc course)

Supervisor
    Zaid Ahmad (MSc dissertation), Nathan Monette (visiting)

Reviewer
    ICLR, ICML (AutoRL), NeurIPS (DeepRL, ALOE, Diffusion Models), DMLR, ACML, Frontiers

Interests

I'm an enthusiastic cook and am currently learning Mandarin Chinese (HSK 3). Previously, I captained the Caius Badminton Club, rowed in the Caius Boat Club, volunteered for Project Access, served as a Cadet Sergeant, and was a finalist at the Warwick Schools Debating Competition.
